Project Backlog - OrcaStars iOS

*Keep in mind the visual differences, such as icons, font, and layout, between Android and iOS.

Priority	Issue Name	Issue Description	Complete?
1	Import the graphics	Import all required graphics into the project so that (at least) the first two screens can be built*	Yes
2	Redesign the Main screen	Redesign the main screen of the app to match better with the Android version* (Just storyboard, no code yet)	Yes
3	Connect the two screens	Create code so that the Restaurant icon button leads to the Restaurant menu screen. (Very simple code for now)	Yes
4	Build the structure for the Restaurant Menu screen	Create code so that the Restaurant Menu screen functions similarly to the recyclerview of Android, complete with placeholders for data.	Yes
5	Build the Restaurant menu screen	Design the Restaurant business menu screen of the app to match the Android version*.	Yes
6	Connect the next two screens	Create code so that the Restaurant listing selected leads to the Restaurant Detail screen.	Yes
7	Build the Restaurant Detail screen	Design the Restaurant business details screen of the app to match the Android version*, complete with placeholders for the data.	Yes
8	OrcaStars About screen	Design the OrcaStars About screen of the app to match the Android version*. (The social media links may not be functional yet)	No
